

Manage Your Financial Data With Us

Our Financial Storage Warehouse allows you to collect sensitive banking information through your buyer portal, offering a secure, tailored solution to store and retrieve your data. All financial information is transmitted securely using the latest encryption technologies monitored by a 24/7 security program.

Our Security is Your Security

We protect your sensitive client data. We are GDPR, EU/US Privacy Shield & SOC II Type II compliant. ConnXus will not share or display financial data on any company profiles, nor will any payments be processed using this information. Financial data is securely stored using industry best practices on a system regularly audited by third party security experts.

Easily & securely collect the following data through your portal:

1. Bank Name
2. Bank Address
3. Bank Contact Name
4. Bank Contact Phone Number
5. ABA Routing Number
6. Account Number
7. Account Type

To access supplier banking information, portal owners must make a request to their ConnXus Account Manager. ConnXus will then provide the requestor with the financial data in an encrypted file, along with the key needed to decrypt it.
